

Walk up and play Immersive Virtual Reality

Kimera™

True unattended, coin-operated, Immersive 3-D Excitement

Immersive Reality™

Is the marriage of video games to Virtual Reality. The Kimera™ Game System combines the best features of both to bring you a new game experience that's easy to own, irresistible to the game player and able to deliver long-term

Totally Unattended Operation

Kimera™ stands alone period! There are no helmet fittings, optical adjustments, game briefings or pre and post-game clean ups. This is true Walk Up and Play operation, just like any other deluxe video game. Coin mechs and bill acceptor are standard. And with its compact footprint, you can locate Kimera™ almost anywhere

Price for Repeat Play

Forget VR play prices of \$4-5 that discourage repeat play. Kimera™ can be priced to play the same as your other deluxe games. They'll play it once because it's immersive virtual reality. And they'll play it again and again because they love the gameplay.

Check out ITI

We're a new company but we're not new to the business. Our staff has over 60 years experience in coin-op and has brought some of the greatest games ever to marketplace. We're proud of our past and proud to bring you another breakthrough with Kimera™.

PYRAMID PILOT™

They can't play this one at home!!

Developed in parallel with the Kimera™ Game system, Pyramid Pilot™ steps forward by bringing back great gameplay. Pyramid Pilot™ Appeals to beginners and experts by combining breathtaking graphics with adrenaline-pumping excitement. Created by Algorithm, Inc., a world leader in 3-D effects, Pyramid Pilot's™ multi-level action takes advantage of Kimera's 360 degree, 6 degree of freedom Immerse-O-Scope™ control system. For the first time, and from the first play, game players truly feel that they are "inside" a game machine. And, you can only play it on Kimera.

Immersive Technologies Incorporated's patented and proprietary design allows full 360 degree, six degree of freedom control. Direct coupling of controls delivers response equal to the best joystick games. No more "sloppy" aiming systems. A true "you are there" experience.
